

JOIN US FOR MARLEY SERVICE CONTRACTOR TRAINING

Course Description:

Our three-day Marley® workshop will emphasize hands-on training, along with six hours of classroom learning, including an overview of tower operating manuals, Marley cooling tower designs, general tower maintenance, tower inspections and tower start-ups. Selling techniques and head-to-head comparisons will be incorporated by utilizing the Marley Parts Proof-in-Performance program.

The workshop incorporates extensive tours of our Research and Development Center and Manufacturing Plant, where you'll see first-hand how SPX designs, tests and manufactures Marley products. Most importantly, you'll get hands-on experience with tower components, including NC® tower fill installation, belt tensioning and sheave alignment, driveshaft/close coupling alignment, fan assembly and fan pitch adjustment, Geareducer® pinion shaft oil seal replacement, controls overview and troubleshooting of Marley control packages.

Completion Certificates:

"Factory Trained" Certificates will be provided upon completion of the Marley service contractor workshop.
